

## Pollinator-Friendly Plants for Your Garden

As you know, Cape May Point is once again participating in the Mayors' Monarch Pledge this year. The Environmental Commission would like to encourage you to make your fall plantings pollinator friendly. We would especially suggest that you plant fall-blooming flowers that will aid late migrating monarchs as they travel through CMPT. We recommend:

- New England Aster, *Symphyotrichum novae-angliae*
- Late-flowering Thoroughwort, *Eupatorium*
- Tall (or Giant) Sunflower, *Helianthus*
- Seaside Goldenrod, *Solidago sempervirens*
